The Water Boards are data rich but information poor. The Office of Information Management and Analysis is committed to improve our ability to convert data into information and to help improve decision making and gain public trust by improving our ability to communicate Water Boards' actions and the conditions of California water resources. This brown bag will provide a high level overview of the most recent legislative mandates related to data (Open Data resolution, AB1755, etc...), the Water Boards coordination efforts with other state and federal agencies, the commitment to open data and transparency and most importantly what are the current strategies to improve our data management and staff ability to access, use, and analyze data.
